

# Open Position – Student Assistant

At the Cognitive Systems research group / FB 3, **starting asap**:

**Details:** The research project Raum 9  $\frac{3}{4}$  funded by the NOWETAS foundation is concerned with the communication of a sense of social closeness between spatially separated working groups by means of ubiquitous multi-media technologies. In Raum 9  $\frac{3}{4}$  we will try to virtually join two research groups at University Oldenburg and University Bremen by means of ubiquitously distributed public displays in the Cartesium and the corresponding building at the University Oldenburg.

This task requires a joint spatial representation of the working environment, movement and configuration analysis, the explicit consideration of privacy preserving communication techniques, as well as the examination of HCI issues due to extensive touch interaction.

**Requirements:** You are a motivated team player and have solid experiences in programming with Java and C#. You are thorough, attentive and reliable in your work, and you can work autonomously at times. This job requires strong communication skills: you will have to communicate and cooperate with a student at the University of Oldenburg!

**Perspective:** This work can be the starting point for a bachelor, master, or diploma thesis!

Work schedule and number of hours per month are flexible (up to 74 hours per month). If you are interested and qualified please contact me with your CV and description of work experiences. Falko Schmid - [schmid@informatik.uni-bremen.de](mailto:schmid@informatik.uni-bremen.de)
