Research Assistant Position / Masters Thesis Wissenschaftliche Hilfskraft / Masterarbeit

Area: Geographic Information Systems, Spatio-Temporal Dynamics

Responsibility: We are looking for student assistants to support us in the implementation, documentation and evaluation of a spatio-temporal reasoning system for application in Geographic Information Systems. The position provides the opportunity to participate in ongoing research activities including research publications and conference presentations.

Desired skills:

- Interest in artificial intelligence
- Good programming skills in object-oriented and / or declarative languages
- Interest in development as well as research

Terms: The position is flexible and several possibilities exist for continuation and long-term association, should there be an ongoing interest in the proposed area of work. It is also possible to engage in a Masters Thesis by identifying research topics that are complementary to the area of work.

The working hours can be up to the maximum of 72hours/month (negotiable).

Applications / Questions should be sent via email to both:

Jan Oliver Wallgrün and Mehul Bhatt
