## Embedded Commissioning of Building Systems

Ömer Akin, *Carnegie Mellon University*

In today's digital, green, and consumer driven marketplace, AEC (Architecture, engineering and construction) professionals are looking for sophisticated approaches, tools and systems to help seamlessly and reliably conduct building performance verification assessments. This groundbreaking book provides a solid understanding of the underpinnings and latest developments of embedded commissioning (ECx) as the overarching building evaluation approach. Supported with nearly 100 illustrations and featuring contributions from an all-star team of experts and pioneers of AEC technology, including Burcu Akinci, Mario Berges, Steven Bushby, James Garrett, Daniel Huber, Sang Hoon Lee, and Tanyel Türkaslan-Bülbül, this unique resource offers in-depth coverage of the most important topics in the field:

- Product models and process models
- BIM (building information modeling)
- Laser technology based modeling
- Mapping between process and product models
- Building codes
- Data access and exchange standards
- Sensor networks
- Value based design
- Field tools and AR/AV methods
- Just-in-time technologies
- Wearable computers
